STEP 4 — *LTE Setup*

① Please insert the SIM card into the LTE Camera.

② From the CamView, right click the icon of the camera to browse the camera web page.

③ Go to Network settings → LTE Settings, key in all the SIM card information, click "Save & Apply" button.

④ Refresh the web page and wait until the "Sim Status" has changed to "Ready".
Click "LTE Test" button to start LTE connection testing.

LTE Network Settings

PIN	0000
APN	
APN User Name	
APN Password	
Sim Status	Ready
Signal Strength	8
Save & Apply	LTE Test

Menu: Information, Network, Wired Network, LTE Settings, Advanced, Video, Schedule, Admin

⑤ When the test result is "Internet connected", **unplug the Ethernet cable.** Wait until the blue LED is on.

RESET

⑥ Now, you could see the Video from your CamView software through LTE connection.

### STEP 1 — *Power on the Camera*

NAT/Router
WAN   LAN
Internet
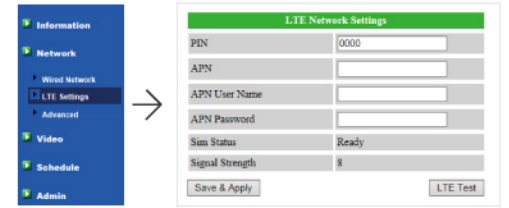

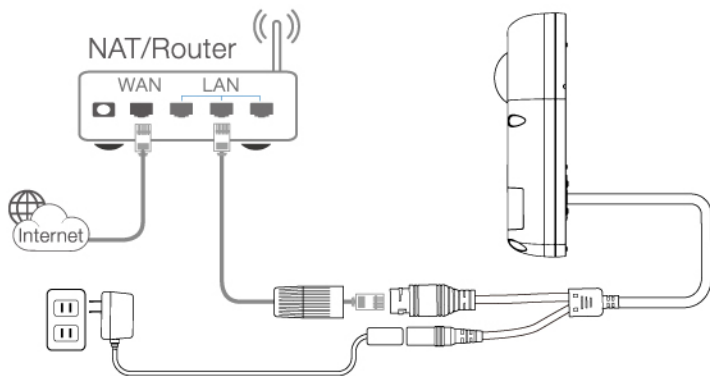

Connect the Power Adapter to the Camera and connect the Ethernet cable.

STEP 5 — *SD Card Recording* · *Class 10 micro SD is prerequisite*

SD-Card Record Setting

○ Always Recording   ● Schedule Recording   ○ Standby

When disk space full: ● Circular recording   ○ Stop recording

SD-Card Status   SD-Card Removed

Save & Apply

Camera List
001001003
- Night mode control
- SD Card Playback
- NAS Playback

Enable SD card recording.

STEP 2 — **Install CamView Software**

Please download the latest CamView software at this address :
http://www.starvedia.com/download.html

After the setup menu pops up, select "Install Management Software" and follow the instructions.

FAQs

Q1 What should I do if I have forgotten the password or the ID/Password card is missing?
Ans Please press the Reset button for five seconds. The camera will reset to the factory default settings. The default video-play password is ipcam (lowercase).

Q2 What should I do if I cannot see the video remotely?
Ans The red LED of the camera should be remain on when the camera is connected to the Internet. If the red LED is blinking, please double check the network connection and settings again.

Q3 I can see the video from a remote location, but the video quality is not satisfying and sometimes the video disconnects and reconnects by itself.
Ans It's probably due to the poor Internet bandwidth (internet speed), which might be not good enough.
You may try to apply for a better Internet connection from your Internet Service Provider or reduce the bandwidth setting of the camera.

Q4 What is the default admin user name/password?
Ans Default admin user name: admin
Default admin password: _____ (leave blank)

Q5 Where to download the latest camView software?
Ans Please refer to the following website to download the latest CamView software.
www.starvedia.com/download.html
